DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Group I, drawn to claims 2 and 3, and 12 and 13, which claim the memory module as claimed in claims 1 and 11, wherein the refresh control circuit evaluates the command signal with regard to a defined command pattern and independently determines therefrom the point in time at which a refresh command will be sent.

Group II, drawn to claims 4 and 14, which claim the memory module as claimed in claims 1 and 11, wherein an adjustable time value has been set in the refresh control circuit, the time value determining the time within which the contents of memory cells in a corresponding memory component are to be refreshed, and the refresh control circuit sending a refresh command based on the adjustable time value.

Group III, drawn to claims 5 and 6, and 15 and 16, which claim the memory module as claimed in claims 1 and 11, wherein the memory components each having a memory cell array organized in the form of a matrix, the array having rows and columns, and the refresh control circuit ascertaining which rows in a selected memory component have not been accessed in a predefined period of time and, based on this evaluation, independently the refresh control circuit determining the point in time at which a refresh command will be sent.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 7 – 10, 11, and 17 – 20 are generic.

3. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

4. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Claims 1 and 11 link(s) inventions I, II, and III. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claims 1 and 11. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Conclusion

7. A shortened statutory period for response to this action is set to expire 1 (one) month and 0 (zero) day from the date of this letter. Failure to respond within the period for response will cause the application to become abandoned (see MPEP 710.02(b)).
